DECLARATION ON GENETICALLY MODIFIED ORGANISM (GMO)

We realize that one of our customers' concerns is the presence of Genetically Modified Organisms (GMO) in our product – carrageenan.

Please be advised that our carrageenan does not contain and is not produced from any genetically modified material, whether active or not. Carrageenan is a 100% pure seaweed derivative and genetically modified organisms are not used as processing aids or additives.

In the event that GMO will have to be introduced into our processing systems and products in the future, we will be issuing a declaration notifying our buyers of such action. In the meantime, should you feel that an audit of our facilities is required, please advise so we can help arrange your visit.

We hope that this declaration will assist you in whatever purpose this will be required.
